DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 have been allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

Regarding claims 1 and 7, the prior art of record to Levy, Toyoda, Mack and Geile either alone or combine fails to teach or suggest a multiprocessor unit, wherein each first and second domain processing means further having each own control processor for controlling a plurality of processors within its domain; and both the first and the second domain processing means further has a global control processor connected to both the first and second domain processing means for configuring the first and second domains. Drogichen et al (now cited) has a control service for configuring domains (Fig. 4); however, Drogichen does not teach the domain has explicitly two domains (they could be more than two) and each domain does not further include each own control processor for controlling their own processors within each domain.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Satagopan et al., Forin, and Mohler disclose systems related to multi-processors with different approaches and techniques.

4. **Any response to this action should be mailed to:**
